Webscraping + NLTK

A short introduction

What is NLTK and why should I use it?

———

- NLTK is a leading platform for building Python programs to work with human language data. It provides easy-to-use interfaces to over 50 corpora and lexical resources such as WordNet, along with a suite of text processing libraries for classification, tokenization, stemming, tagging, parsing, and semantic reasoning.

What is the purpose of this tutorial?

———

In this tutorial you will learn how to:

- Scrape text data from the web using beautiful soup
- Clean said data using NLTK functions
- Recognize and plot patterns in the data

How can I access this tutorial?
